SUMMARY

Recent CS graduate pursuing a full-time software engineering role. Strong fundamentals (data structures and algorithms) and hands-on experience with full-stack development and delivering production features in agile environments.

EDUCATION

University of Michigan College of Literature, Science, and the Arts Ann Arbor, MI | **May 2026**

Bachelor of Science in Computer Science and Economics | GPA: 3.6

Recipient of the University of Michigan HAIL (High Achieving Involved Leader) Scholarship

Nominated for "True Blue" Outstanding Employee of the Year Award

Course Highlights: Discrete Mathematics, Data Structures and Algorithms, Foundations of Computer Science, Computer Science, Computer Organization, Computer Security, Web Systems, Intro to AI, Conversational AI, Intermediate Micro & Macro Economic Theory, International Finance

U of M EECS 183 Showcase: Ann Arbor, MI | **Dec 2022**

Awarded *Grand Prize* in competition against 200 U of M teams

consisting of the complete freshman Computer Science class,

judged by industry leaders JP Morgan Chase, TD Ameritrade, & Charles Schwab

Walled Lake Central High School

Walled Lake, MI | **June 2022**

1510 SAT • 34 ACT • National Merit Scholar Letter of Commendation • Summa Cum Laude • Honors Society • Honor Guard • Symphony Orchestra Violinist Section Leader • Basketball • Tennis

PROJECTS

Personalized Fitness & Nutrition App – Backend Developer (Team of 7)

- Developed FastAPI backend for user authentication and AI-generated workout & meal plans using DeepSeek
- Implemented secure JWT login flow, REST endpoints, and logic to store users, fitness data, and generated plans

Clarke Solitaire – Personal Project

- Built browser-based Solitaire with custom game engine and move logic
- Implemented animations, undo, auto-stack, and valid-move detection

EMPLOYMENT EXPERIENCE

U of M Student Organization Resource Center – Lead Manager Ann Arbor, MI | *Year-round* | **Dec 2022 – May 2026**

- Partner with U of M departments and student organizations to manage advertising needs
- Plan and lead team meetings; coordinate hiring by conducting interviews and onboarding new members
- Develop new revenue streams and meet with clients to support growth

Rocket – Software Engineering Intern

Detroit, MI | **May 2025 – Aug 2025** | **May 2026 – Aug 2026**

- Developed employee-access & parking features using C# and internal APIs, supporting thousands of users
- Redesigned and enhanced an internal website used by thousands of team members to meet modern accessibility and design standards, improving usability and compliance
- Collaborated with my team through daily standup, deployments, code reviews, and production pushes

Bogart Associates – Software Engineering Intern

Remote | **Feb 2026 – May 2026**

- Built and enhanced a full-stack healthcare compliance platform using React, Node.js/Express, and MongoDB to support mock survey workflows, including survey setup, investigations, and reporting.
- Created field-level autosave functionality for complex survey forms so user input was saved incrementally.
- Integrated Auth0 authentication into the platform helping support secure login and role-based access.

SKILLS AND FULL-STACK DEVELOPMENT EXPERIENCE

Languages: C++, C#, Python, HTML/CSS, JavaScript, SQL

Frameworks/Tools: SQLite, React, Git, FastAPI, AWS, Docker, REST APIs, CI/CD (CircleCI)

Other: Test Driven Development, mutation testing, agile/scrum, JWT Authentication, Stata

Athletics: U of M intramural flag football, basketball, volleyball, kickball, and pickleball
